DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-6 in Paper No. 6 is acknowledged.
2. Claims 7-23 are withdrawn from consideration by the examiner as being drawn to inventions non-elected without traverse. The restriction requirement is made FINAL.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation

Art Unit: 1751

under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chassot et al., US 6,436,152 B1. The reference discloses oxidation hair dye precursors as depicted in Formula I, in which R1-5 may be hydrogen, R8 may be methyl, and R6 and R7 may be alkyl of 1-6 carbons; phenyl; or R6 and R7 together may form a piperidine, piperazine or morpholine group (col. 1, lines 66+). Note also example 2, which gives a general synthetic procedure for 2-(1-aminoethyl)-1,4-diaminobenzene compounds. Note further that, while compounds which anticipate the claims are not disclosed, that many of the disclosed compounds are one-homologs of compounds which are disclosed. It would have been obvious at the time the invention was made to the person of ordinary skill in the chemical arts to prepare the recited compounds, because the reference discloses that such compounds have utility as oxidation dye precursors. In addition, one-carbon homologs of such compounds are disclosed, and the person of ordinary skill would expect the claimed compounds to behave similarly. A general synthetic procedure for preparing the R8 = methyl compounds provides further motivation to prepare this class of compounds.
